AC RANGE CATALOGUE

# About Us

With 40 years of Innovation and Excellence, MIRC Electronics Limited (ONIDA) has always been known for high quality innovative and futuristic products.

Being an Indian company and the pride of India for 40 years, Onida has always strategically kept Indians and their needs as the main priority and developed products as per these needs. The company understands the unique requirements of the Indian consumer more than any other company does. This has found expression in many of the innovative products that have been launched over the years. This understanding of the consumer is one of the core strengths of the company that has enabled it to compete in the market in categories like Air Conditioners, LED Panel Displays, Washing Machines, Microwaves and recently introduced Refrigerators, Air coolers and Dishwashers.

Having won the trust of millions of consumers in the Indian Durable space, the brand has been instrumental in introducing new technologies and innovative products and has been communicating about these innovations to consumers in the right way and through the right mediums.

This trust bestowed upon us by our consumers is truly a reflection of our continued success. We always believe in offering the best quality products with high-end specifications at affordable prices, thereby, empowering users with luxury at an attractive price. Taking forward the same approach, we present yet another exemplary range of Air Conditioners that will provide you with an unparalleled experience.

Our Air Conditioners are designed for Indian Climates and with great Pride we will continue to carry on this magnificent legacy to serve you and forever will be **#IndiaKaOnida**.

# 21 To Buy ONIDA AC\* Reasons

**Dual  
Cool!**

## Dual Rotary Heavy Duty Compressor

Dual rotary heavy duty compressor operates with a phase difference of 180° in their mutual compression timing which results in much more stable operation. This not only improves the rotational balance but also bolsters the compression torque making it possible for the compressor to operate from just 700 RPM to a peak frequency of 8000 RPM. So, a 1.5 ton AC coming with dual rotary inverter technology can vary tonnage from as low as 0.3 ton to as high as 1.8 ton.

### Viot

Now your voice can command your AC. Powered by Alexa, this technology enhances the voice recognition smartly via Wi-Fi and delivers an immersive superior personalized experience.

### Magnified Cooling with Multiplier Inverter Technology

Your AC is no longer limited to the rated maximum capacity only. Onida ACs can cool 120% more, magnifying its capacity throughout the day, any where.

### Powerful Cooling

An AC with full capacity that ensures uninterrupted and efficient cooling even at an ambient temperature of 52° C.

### 10 year Warranty

An Inverter AC with 10 years\* warranty on compressor, a category first benefit offered by Onida

\*Offer Period: 1<sup>st</sup> January 2023 to 30<sup>th</sup> June 2023

### PET Engine

The PET Engine controls compressor speed as well as improves the CFM delivered making it efficient and energy saving

### IoT & Wi-Fi Enabled

AC powered with Internet of Things (IoT) module which enables a device such as a smart phone, laptop etc. to communicate with the AC via wireless Network

### Super Energy Saving

Onida Inverter ACs are designed for higher ISEER and run at super low power consumption to provide up to 65% savings in energy bill

### 100% Copper Condenser

Increases the durability of your AC as it is built with 100% all weather grade copper coil which makes the AC reliable and corrosive resistant

### Gold Fin / Blue-Fin Coating

Onida ACs' fins are covered with highly effective corrosion-resistant coatings to prevent any rust due to moisture, in both indoor and outdoor unit

### Smart Digital Display

Onida AC has a Smart Digital Display to indicate the temperature and also turns off the display based on your preference, while still being on

### Anti-Rust IDU & ODU

All our AC units are corrosion resistant with zero rusting due to unique heavy moisture-resistant coatings on IDU and ODU

### I-Feel Sensor

The I-feel sensor senses the temperature around the remote and sets the perfect desired temperature

### Eco-Friendly Gas

Onida AC uses Eco Friendly R32 Refrigerant Gases which have a zero ozone depleting potential and low global warming potential

### Self-Diagnosis

Our ACs can self-detect host of operational issues and showcase error message display. No longer you have to wait for the repair personnel to know what's wrong in your AC anymore

### Stabilizer Free Operation

Onida Inverter ACs operate with-in a wide Voltage range of 160V-250V and has a capability to withstand electricity fluctuations without the requirement of stabilizer

### Silent Operation

Onida ACs indoor units operate with a very low noise level ensuring quieter environment for a sound sleep. Outdoor units also work on silent mode

### Self Clean

Auto-clean feature prevents breeding of moulds, fungus and bacteria by drying up heat exchangers

### Anti Fungus Operation

Prevents growth of harmful micro-organisms by eliminating the moisture inside the indoor unit. Thus giving cleaner and healthier air

### 4D Cooling

4 way cooling instantly cools the room and lets the air reach every nook and corner of the room, providing uniform cooling in all directions.

### Smart Home

Onida's smart cooling features can be operated from any part of the world through its Smart Home app to turn on your AC even when not at home with the help of Wi-Fi connectivity and Infrared technology.

\*Features may vary from model to model. Users are recommended to check the exact features available in a particular model.
